DETAILED ACTION

1. This action is responsive to the applicant's communication filed on 7/23/2004.
2. Claims 24, 26, 36, 51-52, 59, and 61-63 are pending and presented for examination.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 24, 26, 36, 51 and 52, drawn to a method for managing medical images by receiving a plurality of images corresponding to plurality of modalities, and converting the medical images to a common browser format, classified in class 382, subclass 128.
 - II. Claims 59, 61-63, drawn to a medical image management system comprising a decoder engine for extracting image pixel data from image data, and an encoder engine for converting image pixel data to browser compatible format connected to receive image pixel data, classified in class 707, subclass 104.1.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it is usable in a method of managing medical images by receiving a plurality of images corresponding to plurality of modalities, and converting the medical images to a common browser format, classified in class 382, subclass 128. Without requiring a medical image management system comprising a decoder engine for extracting image pixel data from image data, and an encoder

Art Unit: 2165

engine for converting image pixel data to browser compatible format connected to receive image pixel data of group II, classified in class 707, subclass 104.1. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and because the search required for each group is different and not co-extensive for examination purpose, these groups would require different searches in PTO's classification class and subclass. The group I search would require use of search classified in Class 382, subclass 128, which would not required for Groups II. The group II search would require use of search classified in Class 707, subclass 104.1, which would not required for Groups I. Therefore restriction for examination purposes as indicated is proper.

6. A telephone call was made to Attorney Timothy Morella on 12/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacques Veillard whose telephone number is (571) 272-4086. The examiner can normally be reached on Mon. to Fri. from 9 Am to 4:30 PM, alt. Fri. off..
